

Take your institution to a higher security level with LastPass.

Protect every access point campus wide.

Effortless, secure password management and sharing for faculty, staff, and students. Here's why you should deploy LastPass at your institution:

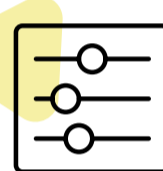

#1 Greater IT visibility, decreased IT burden

Simply and securely manage and share passwords, identify risks and enforce better user habits, achieving greater visibility while reducing the burden on your IT team.

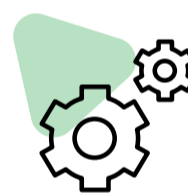

#2 Granular control is total control

We know it's not one size fits all. Your IT team can leverage **100+ customised policies**, and integrate with **Microsoft Active Directory, Microsoft Azure AD, OneLogin and Okta**.

#3 Greater productivity through secure collaboration

Improve department collaboration with secure password sharing to better manage password sharing to better manage changing passwords and access each semester.

#4 Affordable solutions to meet your budget

Each year budgets get tighter and resources slimmer. LastPass has affordable pricing specifically for higher education institutions.

#5 Trusted by your peers in academia

With over 1,200 clients in Academia and counting, you can trust LastPass to help you tackle cyber security challenges commonly faced in Academia.
